

A TRUE IT PARTNERSHIP

Total Network Peace of Mind

Your time is precious. You have more important issues to deal with than your computer network. It is, however, a critical enabler to your business and in need of attention to ensure it's running predictably, optimally and securely. Our fully managed program is the ideal solution for an organization like yours, an organization that demands the utmost in network reliability and quality service.

Total IT support and management for a fixed monthly price – it's that simple. We provide all of the benefits of an internal MIS department for a fraction of the price of staffing one yourself. We reduce the business impact of IT failures by minimizing their occurrence, and any unforeseen issues are dealt with as a top priority. All aspects of your network are covered: security, data protection applications and hardware.

When you outsource the management of your important IT resources to us, we look upon this as a partnership. Our comprehensive approach means we are your IT department. By optimizing your network's performance, it will work at the peak efficiency and reliability levels that your business demands, allowing you to focus on running your business, not your network. Security, networking, data protection and user support - we handle it all for a single, predictable price.

Do these issues plague your business?

No Technology Plan? Does your organization lack a strategy for how technology can best serve it into the future?

IT Budget Crunch? Under pressure to reduce IT costs, increase value or maximize profitability?

Management Struggles? Need to find a more efficient way to manage your company's technology?

Program Advantages:

Increased Productivity: Continuous insight into your network lets us reduce the business impact of IT failure by shortening the time from network failure to issue resolution

Reduced Business Impact from IT Failures: Combining preventative maintenance and remote monitoring means we minimize failures that could impact your business. Your network behaves in a stable and reliable manner

Reduced Network Downtime Through Proactive Maintenance: Through regular, preventative maintenance activities designed to keep your network operating efficiently, we reduce the number of emergency incidents you encounter

I would just like to let you know how pleased we have been with the service you have provided us. This has been the easiest year to date with our computer system operation.

Thank you to you and your team! Dan Watsek, General Manager York Enterprises, LLC

Fully Managed IT Program Elements

Program Features	
24x7 Advanced Performance Monitoring	Ensures all of the critical network devices that comprise your small business network are healthy and functioning reliably and optimally.
Scheduled Preventative Maintenance	Ensures that your servers, PCs and other vital network devices function optimally, improving reliability and security.
Monthly Network Health Review	Dedicates time to review reports and issues that are important to the ongoing performance of your network. We translate technology into business terms for you.
Security & Backup Management	Uses industry best practices to keep your environment secure, protected and available.
Real Time Optimization	Keeps your infrastructure optimized through our NOC enterprise-class technology—critical issues are identified, reported, and resolved in real time.
Unlimited Remote and Onsite Support	Ensures the utmost in business stability and reliability—your single monthly price covers all network, server and workstation support.
